

The Companion Pet Laser – Now Available In Southwest Michigan

You care about your pets and you don't want them to suffer from pain if it can be avoided or removed. Dr. Seely Rotigel, the Visiting Vet, is proud to offer her clients' pets the incredible benefits of the latest and most state-of-the-art therapeutic veterinary laser therapy.

Disorders That Respond Best to Companion Laser Therapy:

- Pain Relief
- Wound Healing
- Arthritic Conditions
- Intervertebral Disc Disease
- Pyotraumatic Dermatitis
- Post Surgical Pain Relief
- Degenerative Joint Disease
- Lick Granulomas
- Degloving Injuries
- Dermatological Conditions
- Periodontal Disease
- Gingivitis
- Otitis
- Severe Ear Infections
- And much, much more!

What Sets the Companion Therapy Laser System Apart:

The Companion Therapy Laser System is the new leader in advanced high power laser therapy resulting in a greater number of photons, greater depth of penetration, and shorter treatment times than other LED and Laser Therapy Devices.

The Companion Therapy Laser is Rate #1 in Power Output — producing the highest power output (more photons) over any other Class III and Class IV therapeutic lasers.

The Companion Therapy Laser is Also Rated #1 in Delivery Application — designed to optimize the power density as well as the treatment area output of the laser.

What that means is far superior care for your pets, relief where there were no other options in the past, and faster recovery times than ever thought possible.
